HEAT SAFETY TIPS

• Stay hydrated. Drink plenty of fluids; drink about 16 ounces before starting and 5-7 ounces every 15 or 20 minutes.
• Avoid dehydrating liquids. Alcohol, coffee, tea and caffeinated soft drinks can hurt more than help.
• Wear protective clothing. Lightweight, light-colored and loose-fitting clothing helps protect against heat. Change clothing if possible if it gets completely saturated.
• Use a damp rag. Wipe your face or put it around your neck.
• Avoid direct sun. Find shade or block out the sun if possible.
• Avoid getting sunburn. Use sunscreen and wear a hat if working outside.

BE ALERT TO SIGNS OF HEAT-RELATED ILLNESS

HEAT STROKE occurs when the body no longer sweats and body temperature reaches dangerous levels. Symptoms of heat stroke include:
• Dry, hot reddish skin and lack of sweating
• High body temperature
• Strong, rapid pulse
• Chills
• Confusion
• Slurred speech

HEAT EXHAUSTION is the body’s response to the loss of water and salt, typically through sweating. Symptoms of heat exhaustion include:
• Excessive sweating
• Weakness or fatigue
• Dizziness and/or confusion
• Clammy skin
• Muscle cramps
• Flushed complexion

HEAT CRAMPS are painful cramps in the body’s muscles due to low salt levels and are typically caused by excessive sweating. Symptoms of heat cramps include:
• Muscle pain usually in the abdomen, arm or legs.
• Muscle spasms usually in the abdomen, arm or legs.

HEAT RASH is an irritation of the skin caused by excessive sweating. Symptoms of heat rash include:
• Red cluster of pimples or small blisters.
• Usually on neck and upper chest, groin area, under the breasts, and in elbow creases.
